

ACTION PLAN

FOR

PROVIDING 100% SAFE DELIVERIES

(2012-13)

Jammu and Kashmir
NATIONAL RURAL HEALTH MISSION

ACTION PLAN FOR PROVIDING 100% SAFE DELIVERIES.

The safe deliveries could be provided by avoiding the three basic delays in provision of maternal health Services.

The three basic delays are:

A. Delay in receiving adequate treatment once a woman has arrived at the health facility:

- Lack of infrastructure
- Lack of Manpower (skilled doctors and nurses)

B. Delay in reaching the health facility:

- Lack of transportation
- Difficult terrain

C. Delay in recognizing the problem and lack of decision making and decision to seek care:

- Lack of awareness of danger signs
- No control over resources
- Health facility inaccessible
- Fear of costs

Three delays could be avoided by:

A. Strengthening of Functional delivery points (according to the bench marks set by Govt. of India)

Detailed gap analysis has been already done for the 133 functional delivery points in the state which will be strengthened first so that 100% safe deliveries can be conducted there and then the other delivery points will be taken in the phased manner. Respective Directorates will be intimated regarding the shortcomings which are coming in ay of provision of 100% safe deliveries, so that timely action is taken.

(i) Infrastructure:

Detailed gap analysis has been done in the existing infrastructure including requirement and supplies of the functional delivery points. This information will be shared with the procurement committee/Controller Provincial Medical Stores of both the Directorates for procurement of identified items as per facility.

(ii) Blood Storage Centers (BSCs)

In order to provide Comprehensive Emergency Obstetric Care services in the FRUs, the Blood Storage Centers (BSCs) for 26 FRUs have been approved and the list of approved BSCs have been shared with the Director Health Service J&K, for their early establishment in the facility.

(iii) Manpower

Rationalization of the staff engaged under NRHM from the non functional to the functional delivery points for their strengthening to ensure availability of the staff

round the clock in these functional delivery points. This was conveyed to both the Directorates of Jammu/Kashmir vide letter No. SHS/J&K/NRHM/909-13 Dated 21st April 2012. The issue of rationalization of the staff has been taken up time and again with the Directorates in different meetings. The final report of rationalization is still awaited from the District Health Societies. The GoI has also conveyed the same as one of the conditionality in the ROP for the year 2012-13.

(iv) Capacity Building

➤ **SBA Training**

NRHM is committed to ensure universal coverage of all births with skilled attendants both in the institution and at community level and provide access to Emergency Obstetric and Neonatal Care services for the women and the newborn. With this objective in mind, SBA training for ANMs/LHVs/SNs and ISM Doctors is presently being undertaken in the State. This is to equip them with the skills for managing normal deliveries, identifying complications, do basic management and then refer the cases to higher facilities, thereby empowering them to save the life of both the mother and the newborn.

In order to strengthen the delivery points the Government of India has approved the budget for SBA trainings for 88 ISM Doctors, 176 Staff Nurses & 176 ANMs/LHVs in the current year's ROP. In this regard, permissibility has been already been circulated to all the districts regarding the SBA trainings so that the training calendar along with the names of nominees and their place of posting should reach this office by 1st week of July, so that trainings are monitored by officials from GOI and State Health Society.

The District wise training loads for the current financial year is 4 ISM Doctors, 8 Staff Nurses and 8 ANM/LHVs.

SBA training has already started in 4 districts viz. Ramban, Kathua, Rajouri and Kishtwar and will be completed in all the districts by 31st December 2012.

➤ **BEmOC Training**

BEmOC training is being imparted to the MBBS Doctors posted in 24X7 PHCs/FRUs. This BEmOC training provides basic skills to the Medical Officers, to handle the common obstetric emergencies and provide the requisite care such as administration of parenteral oxytocics, antibiotics and anti-convulsant drugs, manual removal of the placenta, the conduction of assisted vaginal deliveries, etc.

44 MOs will be trained in BEmOC in the current financial year. Facilities from where nominator for trainings have to be selected are already been identified & nominations for trainees will be sought from Director Health Services, J&K. BEmOC training will be completed by 31st January 2013.

➤ **EmOC Training**

EmOC training is being imparted to the MBBS Doctors posted in FRUs/District Hospitals. This EmOC training provides basic skills to the Medical Officers, to handle the common obstetric emergencies and provide the requisite comprehensive emergency obstetric cases.

16 MOs will be trained in EmOC in the current financial year. Nominations for trainees will be sought from Director Health Services, J&K. EmOC training will be completed by 31st January 2013.

➤ **Life Saving Anesthetic Skills Training**

In some of the FRUs where trained anesthetists are not available State is planning to train MBBS doctors for LSAS. This training will be started in the month of September 2012 and these LSAS trained doctors will be posted in the functional delivery. 8 MOs will be trained in LSAS in the current financial year.

➤ **MDR Trainings**

Maternal Death Review is a method of finding the medical causes of death and ascertaining the personal, family or community factors that may have contributed to the maternal deaths. Community based reviews will be carried out for all deaths that occur in the specified geographical area, irrespective of the place of death, be it at home, facility or in transit. It has been felt that prompt reporting and review of maternal Deaths can provide insight into the cause of death and the possible corrective measures can be taken at all the levels to ensure safe delivery.

1st workshop of the current year has already been conducted at Udhampur on 18th July 2012 where participants from 4 districts viz. Udhampur, Ramban, Doda & Kishtwar participated. A provision of incentive of Rs 100.00 has been kept for reporting maternal death by a community volunteer/ ASHA. An amount of Rs. 250.00 per investigation is provided to Deputy CMO/BMO/MO for Maternal Death Investigation (Verbal Autopsy)

B. Referral transport

(i) 102 call centres

The objective of the Scheme is to devise a system by which the beneficiary, even in rural areas, can have easy and timely access to an ambulance by dialing a single toll free number. Hence, timely access to proper medical care during health emergencies and accidents will help in reducing deaths on the whole. Focus will remain on maternal and child health related emergencies thereby augmenting institutional deliveries and reduction of MMR and IMR.

Setting up of 102 call centers Under Process. District Health Societies have been requested vide letter No. NRHM/J&K/P&S/5008-55 Dated 16-07-2012.

- (ii) **Free referral transport under JSSK**
Drop back facilities are being provided to all pregnant women from facility to home as well since 1st Oct 2011. New operational guidelines for JSSK have been drafted and uploaded on website too.

C. Services & BCC/IEC for more awareness

(i) Schemes:

a) ASHA

ASHA is a trained female health activist in the community who creates awareness on health and its social determinants and mobilizes the community towards local health planning. There are 12,000 ASHAs engaged in the State. ASHAs are not paid any fixed monthly remuneration, however they are paid performance based incentives. ASHA is paid Rs 600/- for escorting the pregnant women for institutional delivery.

b) Jannai Suraksha Yozna (JSY)

To promote institutional deliveries cash benefits are being provided to the mother beneficiaries at Rs 1400/- in Rural areas and Rs 1000/- in urban areas. Regular monitoring and analysis is being done at State Health Society.

c) Jannani Shishu Suraksha Karyakaram (JSSK)

With the launch of the Janani Suraksha Yojana (JSY), the number of institutional deliveries has increased significantly. There are however about 20 to 25% pregnant women who still hesitate to access health facilities. Those who have opted for institutional delivery are not willing to stay for 48 hrs, hampering the provision of essential services both to the mother and neonates, which are critical for identification and management of complications during the first 48 hrs after delivery.

Janani Sishu Suraksh Karyakram (JSSK) has been implemented in the State with view to encourage all pregnant women to deliver in Public Health Faculties and full fill the commitment of achieving cent percent Institutional deliveries .It will also help to reduce the MMR and IMR of the State.

Regular monitoring and analysis is being done at State Health Society.

d) Village health and Nutrition Days

The VHND has been implemented in the State with view to ensure an effective platform for providing first-contact primary health care. The village Health & Nutrition days are held every month (Thursdays) at prefixed AWW Centre of the village. During VHNDs the following services are provided:

- All pregnant women are to be registered.
- Registered pregnant women are to be given ANC.
- Dropout pregnant women eligible for ANC are to be tracked and services are to be provided to them.

Counseling of pregnant women also done regarding:

- Danger signs during pregnancy.
- Importance of institutional delivery and where to go for delivery.
- Importance of seeking post-natal care.

(ii) Mother Child Protection Cards

The State has already initiated Joint MCP card of Ministry of Health & Family Welfare for Monitoring the Services of MCH and Nutrition interventions. This card will be filled at the time of first ANC and ASHA incentives & JSY benefits to the mother will be given upon verification and entries in the Joint MCP card by the ANM. AWW will also use this card for providing supplementary nutrition. MCP Cards also inform the pregnant mothers about the services, complications and where to go at the time of deliveries & complications.

(iii) Safe Motherhood Booklet

This book informs a pregnant mother about her rights on the quality of service delivery being imparted during Antenatal care, postnatal care and Immunization. This year about 1.5 lakhs books will be printed and distributed to all the Health Institutions including both Medical Colleges of the State for those ANCs who are reporting directly to medical Colleges. The file for approval has already been in process and on approval it will be disseminated to all the districts according to their requirements in different languages which have already been taken.

(iv) Production of Video spots and Audio spots on Mother's Health, Child Health, JSY, small family norms, Breast feeding and NSV for creating awareness among the masses. It is an ongoing Activity.

(v) Installation of Flex Hoardings at each district HQ and on national Highway right from Lakhanpur to Leh with NRHM slogans and health slogans. File for installation of hoardings is already in process.

(vi) NRHM Sammelans

District Development Commissioner are already intimated regarding the conducting of Sammelans at Block level vide letter No. NRHM/J&K/P&S/AWARENESS/2012 Dated 12-07-2012. Such sammelans aim at creating awareness among the PRIs, prominent citizens, NGOs, field level health functionaries like ASHAs, ANMs, Angadwadi Workers etc. about various schemes/ components of NRHM who are directly associated with the implementation of these schemes/programmes at the ground level.

All the above mentioned activities are focused for ensuring 100% safe deliveries. Detailed action plan for achieving this is attached as Annexure 1

**Mission Director
NRHM, J&K**

Annexure-I

Action Plan for providing 100% safe deliveries

| Category | Activity | Current status | Responsibility | Time frame | Remarks |
|---|-----------------------------------|---|---|------------|--|
| Strengthening of Functional delivery points (according to the benchmarks set by Govt. of India) | Identification of delivery points | 133 in total (Annexure A) | SHS | | As per benchmark set by GoI & information shared with Directorates Jammu/Kashmir & District Health Societies. Uploaded on website of jknhm.com |
| | Gap Analysis | Infrastructure Detailed gap analysis already done regarding the infrastructure of the functional delivery points (Annexure B) | Director Health Services Jammu/Kashmir | 31st July | As per the data received from District Health Societies, shortfall of following items were noted: ₹130 Additional labor tables required ₹75 Sterilizer/autoclave required ₹32 MVA Syringe required ₹109 outlet forceps required ₹82 ventouse machine required ₹97 Cearean instrument set required ₹20 OT lights required This year procurement committee/Controller Provincial Medical Stores of both the Directorates will be shared this information for procurement of identified items as per facility. |
| | Blood Storage Centres (BSCs) | Line listing of 26 BSCs already done. (Annexure C) | Director Health Services/DHS | | Blood Storage Centers (BSCs) for 26 FRUs have been approved and the list of approved BSCs have been shared with the Directorates and DHS for their early establishment in the facility. |
| | Manpower | The final report of rationalization is still awaited from the District Health Societies. | SHS/Director Health Services | | Rationalization of the staff conveyed to both the Directorates of Jammu/Kashmir vide letter No. SHS/J&K/NRHM/909-13 Dated 21st April 2012. |
